

Walnut Canyon National Monument Vegetation Map Class for Snakeweed/Modified Grassland Complex

The map class "[Snakeweed/Modified Grassland Complex](#)" is composed of the following vegetation associations, each described separately:

- [Aristida purpurea Herbaceous Vegetation](#)
- [Bromus \(tectorum, rubens\) Semi-natural Herbaceous Alliance](#)
- [Bouteloua eriopoda Semi-desert Herbaceous Vegetation](#)
- [Ericameria nauseosa - Gutierrezia sarothrae Shrubland \(Local Assemblage\)](#)
- [Gutierrezia sarothrae Modified Dwarf-shrubland \[Provisional\]](#)

This type occurs in a large, nearly uninterrupted block in the northeastern part of the mapping area. It lies in an area between the Monument access road on the west, US Highway 40 on the north, and Walnut Canyon on the south and east.
